1. What KRA requires

Kenya Revenue Authority (KRA) requires integrator applicants to submit a **read-only optical disk (CD or DVD) prior to certification** of the Trader Invoicing System (TIS) integration.

The disc must contain:

#	Content
1	All files that make up the TIS integration software
2	All PDF documents needed during the certification process

This is a **physical media** requirement. A GitHub link, email attachment, or cloud folder is **not** a substitute unless KRA explicitly accepts an alternative (always confirm with the eTIMS certification unit).

2. When to submit the disc

Submit the optical disk **before** KRA runs your formal TIS certification or sandbox test cycle.

Phase	Action
Now (application stage)	Prepare disc content, burn read-only CD/DVD
With your application	Deliver disc + cover letter to KRA
After KRA accepts application	Receive sandbox credentials
Sandbox testing	Execute certification test plan (separate document)
Certification decision	Production cutover only after KRA approval

Rule of thumb: If KRA has not yet certified your TIS integration, and you are applying as a third-party integrator, the optical disk should be submitted **with or immediately after** your sandbox access application — **not after** certification is complete.

3. What must be on the disc

3.1 TIS integration software (01-SOFTWARE/)

All source files that implement UjenziXform's KRA eTIMS integration, including:

Component	Description
src/lib/etims/	Core TIS library (PO mapping, OSCU init, audit)
src/components/admin/tis-integrator/	Admin TIS Integrator Hub
src/components/etims/	Fiscal receipt and QR UI
src/components/admin/Etims*.tsx	Admin test and PO submit panels
src/components/supplier/SupplierEtimsSettingsPanel.tsx	Supplier KRA settings
supabase/functions/etims-proxy/	Secure KRA API gateway
supabase/functions/_shared/etimsPathAllowlist.ts	REST path allowlist
supabase/migrations/etims / tis	Database schema for TIS

A machine-readable list of every file is in `SOFTWARE_MANIFEST.txt` at the disc root.

3.2 Certification PDFs (02-PDF-DOCUMENTS/)

File	Purpose
01_KRA_TIS_COVER_LETTER.pdf	Sandbox access request
02_EXECUTIVE_SUMMARY.pdf	One-page overview
03_TIS_ETIMS_INTEGRATION_ARCHITECTURE.pdf	Full integration architecture
04_APPENDIX_SAMPLE_SALESREQ.pdf	Sample POST /invoices payload
05_USER_OPERATOR_MANUAL.pdf	Operator procedures
06_INSTALLATION_DEPLOYMENT_GUIDE.pdf	Deployment and configuration
07_CERTIFICATION_TEST_PLAN.pdf	Sandbox test cases
08_OPTICAL_DISK_SUBMISSION_INSTRUCTIONS.pdf	This guide

3.3 Optional (03-SOURCE-DOCUMENTS/)

Markdown and HTML originals from the architecture pack may be included for KRA reviewer reference. PDFs in 02-PDF-DOCUMENTS/ remain the primary certification documents.

3.4 What must NOT be on the disc

Exclude	Reason
.env / .env.local	May contain secrets
Live KRA or Supabase passwords	Security
Full platform codebase unrelated to TIS	Out of scope
Paystack, M-Pesa, or other non-eTIMS secrets	Not part of TIS submission

4. Folder structure on the disc

When the disc is inserted, the **root** should show:

```
README.txt
SOFTWARE_MANIFEST.txt
01-SOFTWARE/
02-PDF-DOCUMENTS/
03-SOURCE-DOCUMENTS/      (optional)
```

Important: Burn the **contents** of the prepared folder — not the parent directory name alone.

Prepared folder on your computer (before burn):

```
D:\UjenziXform\downloads\TIS-OPTICAL-DISK\
```

5. Step 1 — Prepare content on your computer

Open **PowerShell** at the UjenziXform repository root (D:\UjenziXform).

5.1 One-command prepare (recommended)

```
powershell -File scripts/prepare-tis-optical-disk.ps1
```

This script:

- 1. Builds 01-SOFTWARE/ and SOFTWARE_MANIFEST.txt
- 2. Generates all PDFs in 02-PDF-DOCUMENTS/
- 3. Copies optional source documents to 03-SOURCE-DOCUMENTS/
- 4. Prints a pre-burn checklist

5.2 Manual prepare (alternative)

Run each step separately:

```
# Software bundle
powershell -File scripts/build-tis-optical-disk.ps1

# All certification PDFs
powershell -File scripts/generate-tis-cert-pdfs.ps1

# Optional: source Markdown pack
Copy-Item "downloads\TIS-ETIMS-Architecture" `
  "downloads\TIS-OPTICAL-DISK\03-SOURCE-DOCUMENTS" -Recurse -Force
```

5.3 Complete cover letter before final PDF

Edit bracketed fields in:

- `downloads/TIS-ETIMS-Architecture/KRA_TIS_COVER_LETTER.md` (Or `.html`)

Field	Example
Applicant KRA PIN	Your registered PIN
eTIMS portal reference no.	From etims.kra.go.ke application
Primary contact person	Name and title
Contact email / telephone	Support contact
Physical / registered address	Company address
Authorised signatory	Name, title, date

Then regenerate PDFs:

```
powershell -File scripts/generate-tis-cert-pdfs.ps1
```

6. Step 2 — Pre-burn verification checklist

Complete every item before burning:

#	Check	Pass?
1	<code>01-SOFTWARE/</code> exists and contains <code>src/lib/etims/</code> and <code>supabase/functions/etims-proxy/</code>	☐
2	<code>SOFTWARE_MANIFEST.txt</code> lists all files (50+ TIS files)	☐
3	All 8 PDFs present in <code>02-PDF-DOCUMENTS/</code>	☐
4	Cover letter PDF has no bracketed placeholders	☐
5	No <code>.env</code> files anywhere on the disc folder	☐
6	No API keys or passwords in any file (spot-check manifest)	☐
7	<code>README.txt</code> at disc root describes contents	☐
8	Duplicate backup copy of folder saved elsewhere	☐

Quick file count:

```
(Get-ChildItem "downloads\TIS-OPTICAL-DISK\02-PDF-DOCUMENTS\*.pdf").Count  
# Expected: 8
```

7. Step 3 — Burn a read-only CD or DVD

7.1 Media choice

Media	Recommendation
CD-R	Sufficient (~2 MB software + ~2 MB PDFs)
DVD-R	Also fine; use if that is what you have
CD-RW / DVD-RW	Avoid if possible — finalize as read-only is harder
USB stick	Only if KRA explicitly accepts it

7.2 Option A — Windows File Explorer (simplest)

1. Insert blank **CD-R** or **DVD-R**.
2. Open `D:\UjenziXform\downloads\TIS-OPTICAL-DISK\`.
3. Select **all items** inside (not the parent folder):

- `README.txt` - `SOFTWARE_MANIFEST.txt` - `01-SOFTWARE` - `02-PDF-DOCUMENTS` - `03-SOURCE-DOCUMENTS` (if present)

1. Right-click → **Send to** → your **DVD RW Drive (D:)** or similar.
2. Choose **With a CD/DVD player** (mastered) if Windows asks — this finalizes as read-only.
3. Click **Burn to disc** and wait for completion.
4. **Eject and re-insert** the disc.
5. Confirm you can **read** files but **cannot delete or modify** anything on the disc.

7.3 Option B — ISO then burn (ImgBurn / CDBurnerXP)

1. Create an ISO image from the `TIS-OPTICAL-DISK` folder contents.
2. Burn with **Finalize disc** / **Disc at once** enabled.
3. Verify read-only after burn.

7.4 Option C — IT shop / duplication service

Provide the service with:

- Folder: `D:\UjenziXform\downloads\TIS-OPTICAL-DISK\`
- Instruction: **Data disc, finalized read-only, no multi-session**
- Request **two copies** (one for KRA, one for your records)

7.5 After burn — verify on a second PC if possible

Open the disc on another computer and confirm:

- All folders open correctly
- PDFs open in a PDF reader
- Software files are readable text/source (not corrupted)

8. Step 4 — Label the disc

Apply a handwritten or printed label on the disc surface or case:

```
UjenziXform Trader Invoicing System (TIS) v1.0.0
UjenziXform KRA Invoicing Services
Reference: UJX-TIS-KRA-ARCH-2026-001
Submission date: [DD Month YYYY]
KRA eTIMS TIS Certification – Read Only
```

Include the same reference on any **disc sleeve** or **courier envelope**.

9. Step 5 — Submit to KRA

9.1 What to send together

Item	Format
Read-only optical disc	CD or DVD (this guide)
Cover letter	Printed copy matching 01_KRA_TIS_COVER_LETTER.pdf
Company registration docs	As KRA requests (often separate from disc)

9.2 Where and how to deliver

Confirm the current delivery method with KRA:

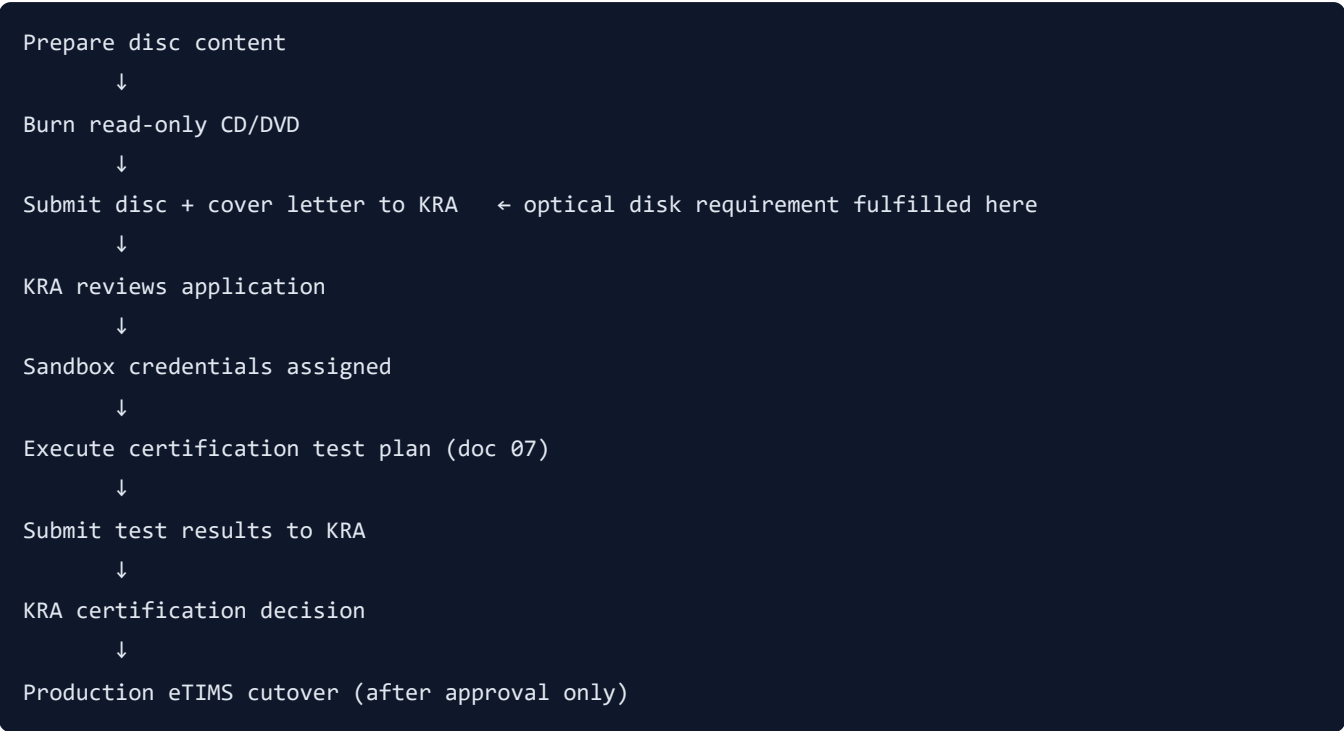

Channel	Notes
eTIMS portal (etims.kra.go.ke)	Upload if integrator application allows attachments
Physical delivery	Times Tower, Haile Selassie Avenue, Nairobi (as per cover letter)
Courier	If KRA certification unit provides a mailing address

Ask KRA explicitly: “Where should we deliver the read-only optical disk for third-party TIS integrator certification?”

9.3 What to record for your files

Record	Why
Date of submission	Audit trail
KRA receipt / reference number	Proof of delivery
Name of KRA officer (if in person)	Follow-up contact
Copy of disc burned	Backup if disc is damaged in transit

10. Certification timeline

The optical disk satisfies KRA’s **pre-certification software and documentation** requirement at the **Submit disc + cover letter** stage.

11. Troubleshooting

Problem	Solution
PDF script fails	Ensure Microsoft Edge is installed; run from repo root
Software script fails	Run PowerShell as normal user; check <code>scripts/build-tis-optical-disk.ps1</code> path
Disc is rewritable after burn	Use CD-R/DVD-R; choose “finalize” / mastered mode; reburn
Files missing on burnt disc	Burn contents of <code>TIS-OPTICAL-DISK\</code> , not an empty parent folder
KRA rejects USB instead of CD	Obtain blank CD-R; confirm media type with KRA before resubmitting
Cover letter still has [brackets]	Edit source MD/HTML; regenerate PDFs; re-burn disc
Manifest count wrong	Re-run <code>build-tis-optical-disk.ps1</code> after code changes

12. Document control

Version	Date	Changes
1.0	2026-06-03	Initial optical disk submission instructions

Related documents:

Document	Location
Gap checklist	OPTICAL_DISK_SUBMISSION_GUIDE.md
Cover letter	KRA_TIS_COVER_LETTER.pdf
Architecture	TIS_ETIMS_INTEGRATION_ARCHITECTURE.pdf
Test plan	CERTIFICATION_TEST_PLAN.pdf

Repository scripts:

Script	Purpose
scripts/prepare-tis-optical-disk.ps1	Full prepare (software + PDFs + optional sources)
scripts/build-tis-optical-disk.ps1	Software bundle only
scripts/generate-tis-cert-pdfs.ps1	PDF generation only

Prepared folder (before burn): D:\UjenziXform\downloads\TIS-OPTICAL-DISK\
